Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 December 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Mayer et al. (2004/0231588). Mayer et al. disclose forming a mask on a substrate; forming at least one trench in the substrate by using the mask; selectively growing a first insulation material only on the substrate in the trench to fill the at least one trench in the substrate in at least a lower part of the one trench with the insulation material in the presence of the mask; and applying a second insulation material over an entire surface of the structure to fill the at least one trench in the substrate at least up to a top side of the mask (see figure 8a). With regards to claim 2, Mayer et al. disclose wherein the substrate is made from silicon, the mask is made from silicon nitride and the first and second insulation materials are formed from silicon oxide. With regards to claim 3, Mayer et al. disclose wherein after the selective deposition a conditioning process is carried out to compact the first insulation material. With regards to claim 5 Mayer et al.

disclose wherein the second insulation material is planarized by chemical mechanical polishing on the mask.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Mayer et al. in view of Curtis. Mayer et al. disclose forming a mask on a substrate; forming at least one trench in the substrate by using the mask; selectively growing a first insulation material only on the substrate in the trench to fill the at least one trench in the substrate in at least a lower part of the one trench with the insulation material in the presence of the mask; and applying a second insulation material over an entire surface of the structure to fill the at least one trench in the substrate at least up to a top side of the mask (see figure 8a). Mayer et al. fails to disclose the second insulation layer deposited by HDP CVD. However Curtis disclose the use of HDP CVD as second dielectric. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine Mayer and Curtis in order to fill gaps and trenches on the substrate (see Curtis column 2 lines 10-15).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2891

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
